**WARNING concerning ammunition marked “+P” and “+P+”.** Recently there have been many developments by ammunition manufacturers and reloaders, not all of them good. It seems some ammunition manufacturers and reloaders are in a horsepower race to see who can develop the most case pressure and muzzle velocity with little regard for practicality or safety. Some of these loads exceed common sense and can virtually tear metal apart. Taurus Firearms rated for “+P” ammunition are rated for Sporting Arms and Ammunition Manufacturers Institute (SAAMI) compliant “+P” ammunition. SAAMI does not recognize any “+P+” ammunition at all. It is DANGEROUS to fire “+P+” ammunition in any Taurus firearm and if you do so you may be seriously injured or killed. In addition, it seems some ammunition marked “-P” is not SAAMI compliant either. There are only four calibers that can carry a “+P” rating from SAAMI. They are 38 Special +P, 9mm Luger +P, 38 Super Automatic and 45 Automatic +P. There are no other SAAMI approved “+P” loads. Any ammunition in any other caliber marked “+P” is not SAAMI compliant, may be dangerous and should not be used. Whenever you are buying “+P” ammunition, look for a notation on the box that states that the ammunition is SAAMI compliant!

**DANGER for “+P”**

Never use “Plus P - Plus” (“+P+”) rated ammunition in any Taurus firearm. The Sporting Arms and Ammunition Manufacturers Institute (SAAMI) does not recognize such ratings and such ammunition can be very dangerous. Firing such ammunition can cause catastrophic failure in firearms resulting in serious bodily injury or death.

**WARNING for “+P”**

Only fire SAAMI rated Plus P (“+P”) ammunition in Taurus Models designated by Taurus for +P use. Firing +P ammunition in other Taurus products may be dangerous and can result in serious bodily injury or death. Those Models are: Model 85 small frame revolver in 38 Special, Model 850 small frame revolver in 38 Special, Model 851 small frame revolver in 38 Special. All firearms chambered in 38 Super Automatic. All firearms chambered in 45 Automatic. All firearms chambered in 9mm Luger.

**WARNING**

Even if your Taurus firearm is rated for Plus-P (“+P”) ammunition, such ammunition generates pressures significantly in excess of the pressures associated with standard ammunition. Such pressures may affect the useful life of the firearm or exceed the margin of safety built into many firearms. Unless you need +P ammunition, do not use it, particularly for practice.
